

Value Wales Framework

Contract Reference: qA852175/TDP

Computerworld Wales is pleased to announce their success in being awarded a place on the Welsh Government **NEW** Value Wales Framework Contract (**qA852175/TDP**)

The new contract, which builds on the success of the original contract (ref WFEP/025/07/5) has been restricted, at present, to the following 2 lots;

Lot 1: The supply of Input Devices (PCs, Notebooks, Tablets, Workstations), Monitors, etc.

Lot 2: The supply of Printers, Scanners, etc..

Despite fierce competition, which saw a reduction in the number of approved suppliers, Computerworld Wales were viewed as being a company which brings value to the supply chain within both the Public and 3rd Sectors throughout Wales.

“We are extremely proud of our achievement in securing a place on this prestigious contract.” says Shaune Parsons, Joint Managing Director of Computerworld.

“Once again the competition was strong, and our success in being awarded a place on the contract is testimony to the hard work of everyone at Computerworld. “

As the procurement arm of the Welsh Assembly Government, the Value Wales division supports improvements in services for the people of Wales by helping the Public Sector, Health, Education and the 3rd Sector to achieve Value for Money.

Value Wales provides advice and support on smarter purchasing, or procurement, working across the whole of the Welsh public services to:

- Drive improvement
- Promote collaboration in purchasing of supplies and delivery of services
- Ensure leadership and strategic direction
- Provide procurement training and Best Practice guidance to help organisations achieve real and sustainable benefits

We hope that our success in gaining a place on the contract will prove to be a catalyst for other suppliers based in Wales to increase the volume of business with Public Sector bodies in all manner of Welsh contracts.

A vibrant Welsh economy can only be good news for everyone in Wales.
